March-2023

BioBoost's main objective is to create a collaborative ecosystem by adopting new forms of governance to overcome systemic barriers and accelerate the bioeconomy in Catalonia.

Bioeconomy is defined as a part of the economic system based on the production and use of renewable biological resources to provide materials, energy, products and services in all economic sectors.

BioBoost aims at mobilising a 30M€ investment in the Catalan bioeconomy sector to promote sustainable and inclusive economic growth.

BioBoost will be giving support to different projects, the so-called BioBoosters, and we are pleased to announce that after several months of collective work, we have signed an alliance with Alcarràs Bioproductors SAT.

Alcarràs Bioproductors SAT is an Agrarian Transformation Society that wants to develop the flagship bioeconomy project in Catalonia, the BIOHUB, a space to develop new business models and foster entrepreneurship around circular bioeconomy.

We look forward to working together with them.

To meet our target, we are looking for other potential Bioboosters. To become one of them, it needs to follow these requirements:

1. It is a project related to bioeconomy, that is, it transforms renewable biological resources and produces materials, energy, products or services in bioeconomy sectors
2. Has systemic impact
3. Need collaboration between different interest groups to succeed
4. Is in Catalonia
5. Promote investments greater than 1M €

We are particularly interested in projects which have the potential to create a positive impact, which are scalable and sustainable in the long term.

We offer a completely free assistance service for the development of bioeconomic projects. If you want more information about the services we offer or want to send your project proposals, send an email to:

+

BioBoost will be participating in the second edition of BIT Congress to be held in Vic on 30th and 31st March.

The BIT Congress is the professional event that promotes solutions to generate new opportunities and facilitate the growth and development of bioeconomy projects. A meeting place for companies, start-ups and research centres that lead the future of the Catalan bioeconomy.

If you want to know more about BioBoost project, visit our stand and ask for information. Tickets for the event are available on the following website: <https://www.congresbit.cat/es/participar/>
